FLOWER BULBS
OUR NATURE

Flower bulbs are in our nature! We know everything there is to know about them. Because we have our own nursery and breeding company we are able to provide the best quality top sized flower bulbs straight from the land. It is in our nature to deliver the best product. We have done this since 1926 with a lot of passion for the profession. For four generations, everything we do has revolved around this beautiful product. So we can truly say, Flower Bulbs, Our Nature!

Kapiteyn is located in the heart of the largest flower bulb production centre of the world. Our customers can be found all over the world. We export +/- 200 million flower bulbs per year to over 40 countries worldwide.

Kapiteyn

KAPITEYN 100 YEARS

In 2026, the Kapiteyn group proudly celebrates its 100th anniversary. What began in 1926 as a family business has grown into an internationally oriented group with a strong reputation in horticulture. For a century, Kapiteyn has been built on entrepreneurship, craftsmanship and a deep rooted passion for flower bulbs. Each generation has contributed to the company's development, always with respect for its heritage and a clear focus on the future.

This centennial milestone is a moment to reflect on the many people who have shaped Kapiteyn over the years. From family members and employees to growers, customers, partners and shareholders, together they form the foundation of our success. Their dedication, trust and long term relationships have enabled Kapiteyn to continuously evolve, adapt to changing markets and invest in innovation, quality and sustainability.

While we proudly look back on 100 years of history, our focus is firmly set on the future. Guided by the third and fourth generation and supported by our entire team, Kapiteyn remains committed to responsible growth, innovation and collaboration. With confidence and ambition, we continue building a strong and resilient company, with the goal of being here not only today, but also for the next 100 years.

OUR HISTORY

1926

Start of Gebroeders Kapiteyn (first generation)

Two of Leen Kapiteijn's sons, Jan and Cornelis, purchased four hectares of land on the Meerweg in Breezand and founded the company Gebroeders Kapiteyn. Helped and guided by their father Leen and brother Adriaan, they started there with the cultivation of flower bulbs. As one of the first flower bulb growers, Jan and Adriaan moved to the northern part of the province of North Holland. This part of the Netherlands has now developed into the largest continuous flower bulb area in the world.

1930

First permanent employees

1937

Second location on the Middenweg

In addition to the farm on the Meerweg that was purchased in 1926, the Gebroeders Kapiteyn were also offered a piece of land on the Middenweg, complete with a five-year-old double-decked flower bulb shed, which was considered modern at the time. The main office of the family company is now located at this site.

1947

The family business expands even further; a piece of land with buildings was purchased on the Grasweg

1953

The second generation entered the company and is on the road five months of the year

The second generation entered the company at a rapid pace; Two sons each from Cornelis, Jan and Adriaan. Leo, a son of Jan, regularly went on business trips to the US. Not for a couple of days, but usually for about four to five months a year. He made the crossing by ship which took twelve days at that time. Given the tremendous distances he had to cover in the US, he bought a car when he arrived, and sold it again when he returned to the Netherlands. There, he focused his attention on the management and growth of the nursery.

1969

To Italy!

1992

The third generation came in contact with the Calla. It was love at first sight

1980

The third generation reports

From the early 1980s, the third generation got to work for the family business. As with the second generation, the subsequent years saw another six Kapiteijns at the helm of the family business.

1998

Proof of good behaviour (third generation)

After a number of successful audits, our company became ISO 9002 Certified. This official Quality Certificate is awarded when an organisation meets the requirements of their customers, the laws and regulations applicable to the product and the requirements of the organisation itself. We scored well on all these points.

2015

The fourth generation

In 2012, Kapiteyn entered a new chapter as the fourth generation of the family business stepped in. Lennaert was the first to join, marking the start of a gradual transition, followed by Sjim in 2017 and Jody in 2018. Together with the entire Kapiteyn team and fellow shareholders, they continue to build on the company's strong foundation and shape its future.

2019

Opening of the Captain Calla production facility

2020

Solar panels

In 2020, Kapiteyn took an important step towards sustainability by installing solar panels on the roofs of its facilities. The initiative started with the new Captain Calla production facility. In the years that followed, solar panels were also installed at Kapiteyn bv. and Kapiteyn horticulture bv, further strengthening the company's commitment to sustainable operations.

2022

Expansion at Kapiteyn bv (4700m2) & Kapiteyn captain calla bv (2400m2)

2026

Celebrating 100 years!

In 2026, the Kapiteyn group celebrates its 100th anniversary. A milestone we are proud to share together with our team, customers, partners and stakeholders. While honouring a century of craftsmanship and entrepreneurship, we look ahead with confidence, committed to building a future that ensures Kapiteyn will still be here 100 years from now.

QUALITY MANAGEMENT

At Kapiteyn, we are committed to sustainability and continuously strive to reduce our carbon footprint. Since 2020, we have installed 900 solar panels to generate renewable energy. In recent years we have expanded this with another 600 panels. We are proud to say that 100% of the materials we use, including plastic, cardboard, paper, metal and scrap, are recyclable. Additionally, we have implemented innovative technologies that have helped us save a lot of water. We believe that these initiatives are crucial in creating a better and greener world for everyone.

OUR FOOTPRINT

> 735 Cubic metres of water saved

LITTLE GROW

LITTLE GROW

Gardening with flower bulbs is lots of fun for children! Playing in and with a natural environment contributes to a balanced and healthy development of children. It makes children more creative, smarter and fitter. Take the kids along in the garden and plant some nice bulbs in all kinds of places, but don't forget the pots and containers.

GIANT BULBS & PERENNIALS

How to choose flower bulbs: size matters! The larger the bulb; the bigger and more beautiful the flower. These special, large, high quality bulbs have great looks and are displayed loose in ready-to-sell display boxes.

DE Wie wählt man Blumenzwiebeln aus? Auf die Größe kommt es an! Je größer die Zwiebel, desto größer und schöner die Blüte. Diese besonderen, großen und hochwertigen Zwiebeln haben eine direkt-vom-Feld Optik. Sie werden als lose Zwiebeln in verkaufsfertigen Displays präsentiert.

FR Comment choisir des bulbes à fleurs : la taille est un des critères les plus importants ! Plus le bulbe est gros, plus la fleur sera grande et belle. Ces bulbes à fleurs spéciaux, grands et sélectionnés ont une belle apparence. Ils sont désormais présentés dans des meubles présentoirs prêts à la vente.

IT Come scegliere i bulbi da fiore: conta molto la grandezza! Se il bulbo è bello grande, vedria che ti viene anche il fiore grande. In poche parole, più grande è meglio è. Questi bulbi grandi, speciali e di alta qualità sono davvero stupendi e pronti per la vendita.

GROW COOK &EAT

GROW, COOK & EAT

More and more attention is being paid to our health, the environment and climate change with more becoming known about the consequences of our food consumption. Our food now travels all over the world having a too large ecological footprint causing us to deplete our planet. The climate is changing rapidly and this realization demonstrates to us that we can be a producer and consumer of our own food by growing our own herbs and vegetables.
